Founder(s): Tomas Bata University in Zlin, Regional Government (Region Zlin) **Owner(s):** Tomas Bata University in Zlin, Regional Government (Region Zlin)

Operator(s): Technology innovation centre Ltd.

Type of entity: Limited company (Ltd.)

Criteria for acceptance of innovation firm: request + business plan

Description of the park

Introduction

Technological Innovation Center s.r.o. (TIC) was founded in 2005 by the Zlín region together with Tomas Bata University with the aim of supporting the innovation ecosystem in the entire region. Since its foundation, TIC has been gradually developing its services, activities and projects. Today we can say that it is progressive for the client agency creating and implementing the Regional Innovation Strategy of the Zlín Region and promoting the quality of life in the Zlín Region focusing on studies, business and professional growth.

Currently, TIC builds on the following pillars:

Creativity and entrepreneurship in pupils and students

Acceleration of business plans, including the operation of a business incubator

Services for small and medium-sized enterprises, especially in the domains of specialization of the Zlín region

Support of research and development in companies with effective cooperation with research organizations

Services for streamlining human resources management, including career counseling and career quidance

Support for the expansion of endogenous companies in the Zlı́n region $% \left(1\right) =\left(1\right) \left(1$

Quality of life in the Zlín region

TIC operates the building of Business Innovation Centre Zlín, the site is owned by the Statutory City

of Zlín, The TIC operates it on the grounds of contract on loan and Zlín is a partner of the whole project. Premises are mostly of office nature and some 5500 m2 of area is available, while leasable area is roughly half. A part of premises is determined for emerging enterprises in advantaged regime which are involved in so called incubation program. Remaining part is used by innovation enterprises in the regime of Technology Park and a part of premises is determined for institutions for enterprising support. Rent involves basic technical and administrative services, such as housekeeping, security of common premises, access to the internet (for incubators) and services of receptions (except to copying and similar services, those are subject to valid price list). There are meeting rooms and training hall available of capacity up to 130 persons (firms residing in the building have some discount). The building also included vegetarian dining room and café and other restaurants are in close area. A part of premises is furnished.

Description of technology transfer

TIC transfer activities in 2021 and 2022 were built on the following pillars:

- a) Membership in the Council for Commercialization of TBU. The subject of the activity was cooperation with the project teams of 8 projects implemented with the support of the TAČR Gama program and the supervision of the fulfillment of project milestones. 7 projects were successfully completed and finally discussed by the Council in 1/2023.
- b) Realization of TIC's own research activities. The key R&D project was Design of a model of metropolitan areas of the Czech Republic affected by depopulation (No. TL03000525) supported by the TAČR Éta program. The project was successfully completed in 9/2022. The project was directly linked to the RIS3 strategy and, with regard to the project partners from the Karlovy Vary Region, ORP Jeseník and the Statutory City of Zlín, had a national impact.
- c) Participation in the preparation of other R&D projects, especially those classified as Applied Research and Experimental Development. The projects were continuously submitted for evaluation until 12/2022, currently in 2/2023 we have a formal acceptability evaluation with a positive result.
- d) Consultation of R&D activities mainly in endogenous SMEs, or incubated start-ups (e.g. Fyscon project submitted 1/2023).

Innovative entrepreneurship training

We implement education and community building in the following fields: workshops for secondary school students, excursions in the business incubator, etc. Business Academy course at the secondary school – www.podnikatelskaakademie.info Bussiness Accelerator – My First Million www.mujprvnimilion.cz Business Academy course at TBU Zlín

Advisory services

Business acceleration program consulting in the development of a business model, business plan marketing consultancy connection to venture capital project preparation member of the Ynovate network program PLATINN, https://www.ticzlin.cz/package/cnim-nad-dav/program-platinn/program CREATINN

Innovation infrastructure

The Zlín region has one of the most numerous and developed infrastructures for building a welcoming innovation environment in the entire Czech Republic. This infrastructure includes a wide range of services related to starting a business to services for established entrepreneurs, e.g. connecting companies with research institutions, international cooperation, technology transfer, expert consulting services or education. In the Zlín region, there is a unified presentation of the offer of support services for entrepreneurs, students or the public. This is the ZLINNOVATION platform, which concentrates services and informs about them through the website www.zlinnovation.cz. Supporting entities are involved in ensuring the activities of the platform on a voluntary basis, and

Supporting entities are involved in ensuring the activities of the platform on a voluntary basis, and the Technological Innovation Center covers it in the role of coordinator. Other members of the platform are: Agency for Business and Investment Support CzechInvest (regional representation), Center for Creative Industries and Entrepreneurship UPPER, Czechitas Zlín, Czech Marine Cluster, Industry Servis ZK, Club of Businesswomen from Zlín, Regional Chamber of Commerce of the Zlín Region, Moravian Aviation Cluster, Plastics Cluster, Business Incubator Panský dvůr Kunovice, Technology Agency of the Czech Republic, Tomás Bata University in Zlín and its Technology Transfer Center - University Institute, Valašskokloboucké Entrepreneurship Center, Zlín Region and Zlín Creative Cluster.

Uniewersytet Szczecinski

Country: Poland

Type of cooperation:

common project

Description:

According to the European youth employment policy, there is a strong call for entrepreneurship education and training and support for young people to start entrepreneurship. The project aims to initiate a systemic change in the field of business education support in the preincubation phase in Europe and also to prepare a set of tools that can be international, since youth unemployment is undoubtedly a European issue.

The aim is to create several outputs, firstly to design and develop an assessment tool that will measure entrepreneurial potential and the improvement of entrepreneurial skills and abilities during students' studies. Another output of the project is the creation and management of a communication platform for students interested in entrepreneurship. The next, third output will be the creation of a methodology for communication tools, i.e. the optimal way to communicate initiative, creativity and entrepreneurship at the university. The last output will be case studies of student business projects in individual partner countries – in the Czech Republic, Poland and Spain.

The project is led by Tomas Bata University in Zlín. Partners are Technological Innovation Center Zlín, Uniewersytet Szczecinski and Universidad Catolica Santa Teresa de Jesus de Avila. The non-profit partner is member of the EU Parliament Michaela Šojdrová.
