Director: (bicova@bicova.cz)

Operating data of the park

Membership in STPA: YES
State of the park: in process of accreditation
Partner in project SPINNET: NO
Launch day: 1.4. 1994

Founder(s): City of Ostrava, OHK, Moravia bank, Moravian leasing company, Institut of the Business Development, VÍTKOVICE

Owner(s): Institut of Business Development, ENTERPRISE NCC 17 alfa s.r.o. , Stavus, TT-contact, VÍTKOVICE a.s.

Operator(s): BIC Ostrava Ltd.

Type of entity: Limited company (Ltd.)

Criteria for acceptance of innovation firm: SMEs and their innovative business plans aimed at production and services for the production

Description of the park

Introduction

Basic activities

- Science and technology park and Business incubator
- Project engineering and advisory service
-

Science and Technology Park and Business Incubator

This activity aims at creation of suitable entrepreneurial environment for companies and start-ups making their own research and development, innovative or technology oriented companies. Companies in the Centre are provided with low-cost premises (office and production) and full range of services connected to their stay in the centre in order to ensure their effective development.

The operator of the STP is the local and regional partnership structure operating within the Moravian-Silesian Region, provides especially SMEs with a full range of services, focused on creating an appropriate environment for the creation and development of especially innovative companies, and the provision of a number of additional related services in an environment of

Science and Technology Park and Business Incubator. We provide consulting services and project management of projects with subsidy support from government and European funds, focusing particularly on innovative projects, support of RTD activities (FP7, EUREKA, national programmes), commercialization of products and support of technology transfer (member of Enterprise Europe Network). BIC Ostrava has also own RTD activities.

To assure the high standard of services provided, BIC Ostrava has been certified in ISO 9001:2000 by the Lloyd's Register Quality Assurance.

Description of technology transfer

Technology transfer support service

BIC Ostrava provide support services and necessary information on funding opportunities for the entrepreneurs, helps them in finding business partners, develop new products and enter new markets .

The example is getting the technology containing the painting and drying line with robot for a company engaged in the production of plastic, wooden and aluminum doors and windows. The technology enabled the accomplishment of higher quality of products, reduced production costs and heightened overall production efficiency.

Another example is the transfer of technology for production of sandwich foamed polyurethane tub for the company producing the heating and cooling showcases. By this transfer, the company gained the control over the substantial part of the production process and the desired quality of the final products.

Innovative entrepreneurship training

Through its activities, BIC Ostrava focuses on the development of innovative entrepreneurship in several ways. At the regional level, we support gaining the information and experience of the innovative entrepreneurs by organizing the training sessions and workshops. At the international level, we are actively involved in the acquisition of high-efficiency technologies for the Czech companies, and, in turn, we support the use of their innovative technologies abroad. We cooperate on creating new innovative business plans and, if required, we identify the possibility of financing.

Advisory services

Project department offers advisory service for entrepreneurs in all stages of their development. Services are provided in different areas:

- start of a new business - business planning,
- access to finance,
- international co-operation,
- research and development co-operation,
- internationalisation of client's output and access to foreign markets,
- technology transfer support.

Innovation infrastructure

BIC Ostrava is involved in the preparation and implementation of regional innovation strategies of the MSK. The strategy aims to provide the coordinated and systematic support to the research, development and innovation activities. The main areas of RIS is to support the integration of the result of research and development into the corporate sector. RIS supports the human resources' development in research and the international cooperation. These activities are implemented

through specific development projects (eg. Innovation vouchers, brokerage events, cluster organizations, financial support of the human resources' education, technology foresight, etc.).

Cooperation with universities

Universities from the Moravian-Silesian Region were partners of BIC Ostrava within the cooperation in various projects, eg. 7th Framework Programme, the BISONet programme, the research and development projects. BIC Ostrava also meets the Universities when preparing and implementing the innovative projects of companies within its consultancy services.
